

PRACHI

Full-Stack Software Engineer | MERN Stack & AI Solutions

Driving end-to-end web application development through modern full-stack engineering, AI-powered innovation, and scalable software architecture.

CONTACT DETAILS

-  kprachimth@gmail.com
-  +91 74989 95230
-  Pune, India
-  LinkedIn
-  <https://github.com/prachi1507>

EDUCATION

-  Master of Computer Applications (MCA) | Sinhgad Institute of Management | 73.8%
-  Bachelor of Science (Computer Science) | H.V. Desai College of Science, Pune | 71.2%

CORE COMPETENCIES

- Full-Stack Application Development
- Frontend Engineering
- Backend Engineering
- RESTful API Development
- AI Solution Development
- Scalable Application Development
- Database Design & Management
- Application Performance Optimization
- Software Architecture & Design
- Agile Software Development

SOFT SKILLS

-  Problem Solving
-  Analytical Thinking
-  Cross-Functional Collaboration
-  Agile Mindset
-  Continuous Learning

PERSONAL DETAILS

Date of Birth : 15/07/2000
Languages Known : English & Hindi

PROFILE SUMMARY

Portfolio

- Full-Stack Developer with **3+ years** of experience building scalable MERN stack applications & AI-integrated SaaS solutions across the software development lifecycle.
- Proficient in **React.js, Node.js, Express.js, MongoDB, TypeScript, and REST APIs**, delivering responsive, high-performance web applications.
- Hands-on experience integrating **Generative AI, LLMs, and third-party AI APIs** to develop intelligent automation and AI-powered product features.
- Skilled in **AWS, Docker, CI/CD, Agile development, and performance optimization**, with a strong focus on clean code, reusable components, and scalable application architecture.

TECHNICAL SKILLS

- Programming Languages:** C, C++, JavaScript (ES6+), TypeScript
- Frontend Technologies:** React.js, Redux Toolkit, Next.js, D3.js, HTML5, CSS3, Responsive UI
- Backend Technologies:** Node.js, Express.js, REST APIs, GraphQL
- Databases:** MongoDB, PostgreSQL
- AI & LLM:** GenAI, Large Language Models (LLMs), AI Integration, Third-Party AI APIs, AI-
- Cloud & DevOps:** AWS (EC2, S3), Docker, GitHub Actions, Jenkins, CI/CD
- Development Practices:** Data Structures & Algorithms (DSA), Problem Solving, SOLID Principles, Design Patterns, Agile (Scrum)
- Tools & IDEs:** Git, GitHub, VS Code, Visual Studio, IntelliJ IDEA, Eclipse
- Operating Systems:** Linux, Windows

WORK EXPERIENCE

Bqarlson Software Technologies Pvt. Ltd. | Software Engineer-II | Mar 2026 – Present

- Full-Stack Development:** Built scalable end-to-end web applications in an Agile environment, translating business requirements into production-ready solutions.
- Frontend & Backend Engineering:** Developed responsive MERN-stack applications using React.js, Redux Toolkit, TypeScript, Node.js, Express.js, and MongoDB.
- Performance Optimization:** Improved application performance through code splitting, lazy loading, memorization & API caching, reducing page load time by **~30%**.
- REST API Development:** Designed and integrated RESTful APIs, improving application responsiveness and data exchange efficiency by **25%**.

Beckhoff Automation Pvt. Ltd. | Software Engineer | Aug 2024 – Feb 2026

- Application Development:** Developed clean, scalable application code using JavaScript (ES6+), TypeScript, SOLID principles, and design patterns.
- Product Engineering:** Built responsive web applications for workforce management platforms, AI chatbots, and QA automation solutions.
- UI Development:** Created reusable React.js components, including modals, charts, and data tables, enhancing user experience and interface responsiveness.
- DevOps & CI/CD Support:** Worked in Docker-based environments and supported CI/CD pipelines through Git-based version control & automated deployment workflows.

Gut Lernen Technocraft Pvt. Ltd. | Associate Software Engineer | Apr 2023 – Jul 2024

- API Integration & Engineering Quality:** Integrated **RESTful APIs** and contributed to debugging, performance optimization, code reviews, and reusable component development while following **Agile, Git, CI/CD, and modern software engineering best practices**.

PROJECTS

Project 1: Skyline CRM AI

Tech Stack: MongoDB | Express.js | React.js | Node.js | Google Gemini API | Socket.io | JWT | Docker | GitHub Actions | AWS EC2 | Nginx | Jest | React Testing Library

Project Overview:

Developed a cloud-based AI-powered CRM SaaS platform for lead management, sales pipelines, contacts, tasks, and analytics. Integrated Google Gemini for AI-driven lead summaries, email generation, and sales insights with secure multi-tenant architecture.

Project 2: Customer Support SaaS Platform

Tech Stack: Next.js | Node.js | MongoDB | OpenAI API | GitHub APIs & Webhooks | Docker | GitHub Actions | JWT

Project Overview:

Developed a full-stack AI-powered customer support SaaS platform that automates ticket management using LLM-driven intent classification, contextual response generation, and intelligent escalation workflows. The platform supports secure multi-role access, real-time collaboration, analytics, and cloud-native deployment.
